GW

Hi Avelea:

Thanks for your patience! I am trying to get caught up with all my overdue projects, thanks to fighting off a flu.

Levels- peak -6.5dB, should be around -6db, perfect levels!

Noise floor (Normalized to 0dB) -60dB, should be under -55dB ideally, VERY quiet studio, nice job!

Mic technique- I think your mic placement is really good. I know it's not easy with the Kaotica Eyeball on the mic, but you have sibilance under control as well.

Acoustics- I wouldn't have thought a gardening shed would sound very good, but you did a nice job treating it acoustically. I am not too sure how much the Eyeball is helping, but what I am hearing in your sample leaves me with little to complain about.

If you'd like further guidance:

Hey George Whittam,

You just had 1 file uploaded to fileinbox.com/edgestudio_soundcheck:

- owlcatvoiceovers@gmail.com/Archive.zip 3.349 MB

These files were sent to your Dropbox in the [Apps/DBinbox folder](#) or [Apps/Fileinbox folder](#), where they will remain until you delete them.

Please note that the download links above are set to expire after 48 hours. Do not send these links as a method to send the files to others or host on your website. They are simply intended as a back-up retrieval method in the event that the transfer to your Dropbox account failed.

Warmest human regards,
The Fileinbox Robot.

PS: This email was automatically generated, but you can still reply to talk to an actual person :)
